

Remanufactured Sonosite Titan

The SonoSite TITAN provides high-resolution modular ultrasound imaging in a compact lightweight and durable system for rapid response.

- Stationary and mobile usage
- Point-of-care connectivity
- Flexible, cost-effective paths that enable users to acquire new components and software applications.

This ultrasound system's modularity is based on SonoSite's proprietary ASIC (Application Specific Integrated Circuit) technology, and combines the high performance of cart-based systems with the speed, flexibility and durability of mobile ultrasound devices. The Sonosite Titan delivers point-of-care connectivity through its Mobile Docking System, allowing the user to connect to the health care provider's internal and external information systems.

Imaging Modes on the Titan:

2D Split screen, Zoom, Color power Doppler, M-Mode: 3 sweep speeds 1/2:1/2, 1/3:2/3 or full screen options, Pulsed wave (PW), Doppler Continuous wave (CW), Doppler Velocity based color flow Doppler, Duplex imaging, Tissue Harmonic Imaging (THI)
